

GMA Garnet™

ExtremeBlast

HIGHER PRODUCTIVITY | COST EFFECTIVE | SUPERIOR SURFACE FINISH | SAFER | NO HAZARDOUS COMPOUNDS

GMA's ExtremeBlast is our coarsest garnet grade engineered for the most resilient coating removal jobs. The unique blend of both alluvial and hard rock garnet is ideal for industrial maintenance in refineries, shipyards and offshore platforms.

Our angular hard rock garnet removes resilient industrial coatings, and the durability of our sub-angular alluvial garnet helps sweep off remaining surface contaminants. ExtremeBlast is ideal for heavy industry maintenance in refineries, shipyards and offshore platforms.

It is a superior blasting media approved by major paint manufacturers, oil companies, shipyards and international fabricators. Throughout the world, garnet is recognized as the leading high performance, cost efficient and safe choice for a variety of blasting applications. And wherever garnet is used, GMA products set the standard.

Major Industries

- Oil & gas
- Energy
- Pipelines
- Shipyards maintenance & repair
- Water & waste
- Construction

GMA Garnet™ ExtremeBlast

- **Higher productivity** – blends of angular and sub-angular garnet impacting the coated surface that help blast faster
- **Cost effective** – lower garnet consumption against other abrasives, lower labor, clean up and disposal costs
- **Superior surface finish** – uniform surface profile, negligible embedment and SP 10 near white metal blast cleaning standard
- **Safer** – produces less dust and improves operator’s visibility, infinitesimal heavy metal and silica levels
- **Contains no hazardous compounds** – environmentally friendly.

ExtremeBlast	Features	Application
<p>Our coarsest grade developed for the most resilient coating removal jobs.</p>	<p>Removal of exceptionally resistant specialty coatings, thick mil tank liners and marine foulings.</p> <ul style="list-style-type: none"> • Uniform surface profile of >3.5mil • Blasting rates: Up to 230 ft²/hr • Consumption rates: 2 - 3.5 lb/ft² 	<ul style="list-style-type: none"> • Removal of 30+ mil coatings • Heavy industrial maintenance on tank liners, coal tar, heavy marine coatings and fouling • High build coating removal • Offshore platform deck coatings • TSA Removal and Preparation • Ship hulls and ballast tanks
